EDUCATION

Graphic Era Deemed To Be University

08 2023 – 05 2027

B.Tech CSE(AI and ML) - CGPA - 6.85

Dehradun, India

COURSEWORK / SKILLS

- Data Structures & Algorithms
- Database Management System (DBMS)
- Natural Language Processing (NLP)
- Large Language Models (LLMs) and GenAI
- Operating Systems
- OOPS Concept
- Image Processing and Computer Vision
- Computer Network
- Machine Learning
- MERN Stack
- Python
- Deep Learning

PROJECTS

QR-Barcode-Authentication-system | Flask, OpenCV, and PyZbar

05 2025

- Engineered a single-page web application using Flask, and centralizing the authentication into a responsive browser dashboard.
- Developed a real-time computer vision pipeline utilizing OpenCV and Pyzbar to instantly capture, decode, and verify over 8 distinct barcode and QR code formats.
- Designed dynamic code generation and video stream processing, ensuring 100% automated access logging.

AgentForge: Multi-Agent Prototype Builder | React, MongoDB, Ollama, Local LLM

10 2025

- Architected an 8-stage autonomous pipeline that automated UI component creation, reducing manual prototyping time by 85%.
- Integrated local LLMs including Llama 3.1 and Qwen via Ollama for intelligent code prediction, achieving a 94% syntax accuracy.
- Engineered concurrent backend system to manage complex multi-agent state transitions, and securing user data across 98% of endpoints using robust JWT authentication.
- Developed a responsive, live-preview frontend using Vite and Tailwind CSS to render multi-page content, increasing user engagement by over 85%

BERT Based Sentiment Analyzer | PyTorch, Hugging Face Transformers, and Gradio

03 2026

- Engineered a robust sentiment analysis system by fine-tuning a BERT-based architecture on a 25k sample IMDB dataset using Hugging Face Transformers, achieving 92% accuracy, a 0.91 F1 score.
- Designed, deployed a UI using Gradio, featuring real-time sentiment prediction with dynamic confidence score
- Optimized pipeline with 512 token length, 10 epochs, batch size 64 training.

INTERNSHIP

Grahic Era Deemed To Be University

07 2025 – 08 2025

Computer Vision Intern

Dehradun, India

- **People Counting and Classification System**
- Created a real-time pipeline using **YOLOv8**, **OpenCV** for **90%** accuracy while processing video at **15 FPS**.
- Integrated ByteTrack for occlusion-resistant object tracking & DeepFace to classify 6 demographic categories.
- Engineered a Flask dashboard to manage 2 video streams via MJPEG, utilizing SSE for live metric updates while maintaining a lightweight 1GB RAM footprint.
- Developed directional boundary logic for 100% automated entry/exit counting, with logs and reports.

TECHNICAL SKILLS

Languages: Python, C, SQL, NoSQL

Developer Tools: Git, GitHub, VS Code, PyCharm, Jupyter Notebook, Google Colab, Kaggle, Hugging Face

Technologies/Frameworks: PyTorch, TensorFlow, scikit-learn, OpenCV, YOLO, Pandas, Matplotlib, Seaborn, Flask, MySQL, MongoDB, Streamlit, Gradio, Machine Learning, NLP, Computer Vision, GANs

EXTRACURRICULAR ACTIVITIES

- Participated actively in 4 IEEE Technical Workshops and Seminars to gain hands-on exposure to Machine Learning, Data Analysis, GenAI and emerging industry standards
- Collaborated with 3–5 team members across 5+ projects and reducing project completion time by 40% through structured workflows.
